## USB Drive Data Recovery

Established in 2008, USB Drive Data Recovery is a well-known software development company. In addition to developing commercial software products, we also develop software utilities for many industry sectors. For data backup, data recovery, data retrieval, and other recovery utilities, we offer a variety of software options. All of the software tools are available on our website, which is located at <https://www.usbdrivedatarecovery.com>.

The screenshot displays the DDR Professional software interface. The title bar reads "Basic Search". The main header features the "DDR Professional" logo and the tagline "Speedy & Mighty" with images of a magnifying glass, a yellow hard hat, a screwdriver, and a pen. Below the header, there is a navigation pane on the left with icons for "Save", "Load Log", "Save Log", and "Contact us". The central area shows a directory tree on the left with folders like "Executive forms", "Backslashes Possibly", and "\_RATIN~1". The right pane displays a list of recovered files with columns for Name, Type, Size, Date, and Time. Below the list, it shows "Current Folder: HTTP Post \Backslashes Possibly" and "14 Files, 0 Folders". At the bottom, there is an information icon and a text box: "Select Files and Folders from left Panel Directories Tree or right Panel List and Click on 'Save Data' button to save recovered Files and Folders." The website URL "USBDriveDataRecovery.com" is prominently displayed at the bottom center.
